Current Frontend Developer at Onlee Agency with 4+ years of specializing in Web Development, Deployment, and Software research & integrations. Proficient in Frontend Development, with additional skills in crafting exceptional web solutions and project management using multiple technologies. Interested in devising a better problem-solving method for challenging tasks, and learning new technologies and tools if the need arise.

## EXPERIENCE

**Frontend Developer**                                                                                              **July 2019 - Present**
*Onlee Agency*                                                                                                          *Rajkot, Gujarat, India*

- Translated visual and conceptual designs into pixel perfect functional websites using Webflow and proficiently coded necessary elements as well as whole design.
- Developed responsive designs employing a client-first framework in Webflow, ensuring optimal user experiences.
- Conducted testing to guarantee bug-free, fully responsive websites and actively debugged and troubleshot issues, providing timely and effective solutions.
- Demonstrated leadership by assigning tasks, managing and solving complex project issues, and maintaining daily task records for junior team members.
- Proven adaptability and a commitment to continuous learning by acquiring new technologies like Bootstrap, ReactJS, Node.js, and implementing custom designs using third-party libraries such as Splide/Swiper.
- Ensured seamless performance across various browsers, guaranteeing a consistent user experience for a diverse audience.
- Implemented responsive design strategies for images and media, enhancing the overall adaptability of web applications across different devices.
- Worked closely with team to bring design concepts to life, maintaining a strong strategy between visual design structure and functionality.
- Proficiently utilized version control systems such as Git, Github, Bitbucket, ensuring collaborative development processes and efficient code management.
- Actively participated in and conducted code reviews, provided a collaborative and knowledge-sharing environment within the development team.
- Stayed close to current design trends and integrated modern design principles, ensuring web applications remain visually appealing and up-to-date based on client requirement.
